Investigation Of SBA Is Underway

The Nixon Administration's minority capitalism program is under federal investigation for alleged bribes and kickbacks.

Reports, stemming from the East Bay and other California cities, are that minority contractors, participating in the 8 (a) Program, Small Business Administration, were forced to purchase a table of ten at the President's \$100 per plate dinner, held by members of the Blacks to Re-Elect The President, in Washington, or "we shall take a close look at those minority contractors who fail to take one," it was alleged.

Present at the dinner were many Democrat minority contractors, whom it is doubtful would have attended, were they not coerced.

Since the dinner, many of the sub-contractors who failed to respond have lost their contracts and have gone out of business.

Reports steaming in state that minorities who attempted to obtain a loan to go into business were informed that a percentage of the business or a cash settlement would have to be given to facilitate the loan. Those who

tice is looking into the charges of political and criminal activity, and FBI agents have already interviewed some of the program's present and former officials and staff members.

The charges, under investigation, mainly involving the Office of Minority Business Enterprise, which administers the bulk of the program, have been turned over to the office of the special Watergate prosecutor.

In addition, the Senate Watergate committee heard testimony, last week, that the minority capitalism program had been used to reward supporters and punish non-supporters of the administration in the minority business community.

Other congressional committees also are investigating the program.

The criminal investigation centers on allegations that applicants for federal funds and recipients of aid under the program, were the targets of persons seeking illegal payoffs, ostensibly in return for pushing through contracts and grants.

Administration sources said that investigators were looking into reports

Los Arboles Applies For Library Grant

An \$83,000 federal grant is being sought by the Monterey Peninsula Unified School District to develop a new multi-media center at Marina's Los Arboles Junior High School library.

Trustees approved the application at their meeting November 5.

If the application is approved by the government, the school would become the third in the district to have an exemplary library program. Multi-media centers now exist at King Junior High School and at Highland Elementary School.

Principal Robert Stadille told the board the federal funds would be used to expand the library's collection of books, periodicals and audio visual materials, such as movies, filmstrips, recordings, slides and other learning devices. Added to the federal money would be \$16,000 in district funds to be used for purchase of equipment, remodeling of the library and hiring of a media technician to work in the multi-media center.

Reports given by three schools involved in the state's new Early Childhood Education program indicated the program is being successful so far. Principals and advisory committee chairpersons from Hilltop, Del Rey Woods and Patton schools, told trustees that the program has increased parent involvement in the schools, and led to growing trust between parents and teachers. At the schools,

additional funding provided by the program has been used to hire teacher aides, and to buy materials and equipment to help in the classroom. The program is designed to bring about improvement in education in kindergarten and grades one, two and three.

This year's ethnic survey was given to the board and showed that the overall percentage of minority students has not changed this year compared to last year.

In all, 36.5 per cent of the district's student population this year come from minority ethnic groups, compared with 36.3 per cent last year. There have been changes ranging up to around 10 per cent in the ethnic makeup at several individual schools, however.

Board members told administrators to look for alternatives to suspension as a means of punishing students for social misconduct. The direction followed discussion of a letter from a parent whose son was suspended from a junior high school for being "drunk and disorderly." The mother agreed that punishment was necessary, but questioned the social and educational value of simply banishing a child from school for several days. She found an ally in Trustee G. Gervaise Davis III, who said suspension was "counter productive" to the job of the schools. He urged administrators to find alternatives that can be used to discipline children.

Cancer Education Week

"Husbands can play a major role in assuring the good health of their wives," according to Dr. Stephen Thorngate, this year's Cancer Education Week chairman.

Cancer Education Week, sponsored by the Monterey-San Benito County Unit of the American Cancer Society, will run from Nov. 12 through Nov. 18.

"If every American woman would have this annual Pap test, this type of cancer would be a thing of the past," Dr. Thorngate said, "Yet, sadly, about 12,000 women will die of this disease in 1973."

"Because we do feel that husbands have such an important role, we are distributing posters with the

message to husbands, 'If you love her, remind her to have a Pap test,'" Dr. Thorngate said.

A sampling of women's club members to see what percentage of women have had a Pap test, or plan to have one, is being taken by the two-county unit. Literature stressing the importance of the test also is being distributed to the clubs.

Pharmacies in the Tri-County Pharmaceutical Association are co-operating in distributing posters and pamphlets. Pamphlets also are being placed in doctors' offices.

The American Cancer Society places great emphasis on the Pap test because this early means

of cancer detection could virtually eliminate cancer as the cause of death.

"The Pap test, named after a Greek-born doctor, George Papanicolaou, who discovered it more than 30 years ago, detects cancer of the uterine cervix (Neck of the womb) about 95 percent of the time and cancer of the uterine corpus (Body of the uterus) about 60 percent of the time", according to Dr. Thorngate.

Why do Christian concepts endure?

The qualities expressed by Jesus have influenced men through the ages. Though frequently trampled upon, these gentle attributes emerge unharmed.

What is their remarkable strength?

When you're met with another's forgiveness, meekness, and unselfed love, why is it that your own bitterness fades?

There is a book which explores the penetrating effect on men's lives of these simple expressions of good. It speaks of the timeless spiritual laws which underlie these Christian qualities.

The book is Science and Health with Key to the Scriptures by Mary Baker Eddy.

A paperback copy of this book can be obtained by sending this coupon to:

Your Mayor Reports

by Joe Dolan

SUPPORT SOLICITED

Quoted below is the text of the telegram received on November 8, 1973 from the President.

"In my message to the nation on our energy outlook, I indicated the kinds of action that the Federal Government will be taking to achieve our national goals.

One measure which I have taken today, by presidential directive, is to order that no federal vehicle shall be operated at speeds over 50 miles per hour, except in case of emergency. I am asking that you and your fellow leaders of state and government do likewise, to the extent of your authority. By reducing the speed which our automobiles travel, to 50 miles per hour nationally, we can achieve energy savings approaching one-quarter million barrels of fuel per day.

Further, I am asking Congress for emergency powers which will include authority to reduce the automobile speed limit to 50 miles per hour on all interstate highways. Your cooperation and leadership are essential if we are to achieve our fuel conservation goals.

Thank you for your assistance in this matter of vital concern to all Americans."

To the maximum extent possible, all City employees will adhere to the above request - consistent with SAFETY on California's freeways.

Additionally, to help conserve energy, all our citizens are requested to voluntarily conserve on all fuel and energy requirements. Lighting and heating of homes can be substantially reduced by conscientious efforts by one and all.

The Monterey Peninsula School District could turn off all inside lighting by 10 p.m. At this hour (curfew) the majority of our young people are off the streets; each school's cleaning staff could turn off lights at that hour or whenever they finish up the nightly cleaning of the schools.

Common sense conservation measures are in direct need.

Bob Wood Reports

I doubt if many of you realize that up to now it's been very hard for a single woman, regardless of whether she is unmarried, a widow or divorced, to obtain credit. I didn't realize it until I started receiving letters from many such woman, telling of their predicament. The Legislature has now changed this, and no longer will creditors be able to deny credit to a woman, regardless of her marital status, when a man with similar earnings or property would be granted credit.

The bill that will become law, will eliminate the discriminatory credit practices that continue to prevent women from obtaining credit solely because of their sex or marital status. I'm sure passage of this particular bill please the Women's Right's Organization. I voted "yes" on this bill, not because I always agree with the Women's Right's Groups, this is for sure, but because it makes good sense and I'm sure it has placed a hardship on many an eligible woman.

However, the Governor vetoed another bill, supported by the Women's Right's Organization, that would have required public schools and colleges to provide physical education facilities and programs for girls comparable to those furnished boy or male students. Although we have 3 daughters and no sons in our family, I voted against this bill and I notice the Governor must have felt the same way because he vetoed it. My reasons for not approving the bill was the cost it would place on the school districts, plus the fact that our office has received no mail from any disgruntled high school, junior college, or college coed claiming they wanted an inter-city athletic league set up for girl teams only.

I sort of doubt if a volley ball game between Ohio State coeds and U.S.C. Trojan girl students would really draw enough of a crowd in the Rose Bowl to pay back the school districts the money it would cost to prepare for such an event.

C of C Progress Report

Meeting with the presence of Maj. General Robert G. Gard, Commanding General of Fort Ord. He thanked the Seaside Chamber for the tremendous effort in organizing the Chambers of Commerce of the Monterey Peninsula to put on the Military Community Week Olde-Fashioned Picnic.

General Gard also mentioned that this is an important milestone for the Military and Civilian Communities of the Peninsula. He said that this proves that the military installations are a welcome and integral part of this community.

At the last Board Meeting we also elected our officers for 1974. In case you haven't heard before, they are: President William Brown; 1st Vice President Bob McCauley of Cardinal Moving & Storage; 2nd Vice President Carl Oliver of H & H Supply; 3rd Vice President Walter Norwick of Walter's Fashions; Secretary Attorney Mark Sincoff; Treasurer Dick Penrose of Seaside Rexall Drugs.

The Installation of Officers will be held at the Fort Ord Officers Club on Tuesday, Dec. 11. Social Hour at 6:30 p.m. and Dinner at 7:30 p.m., followed by the Installation Ceremonies. Everyone is welcome to come, but please let us know before December 3.

It is important that members of the Chamber become involved in the activities and programs. The Board will be organizing the updated version of the Program of Work, but at present we have the following committees which could use your support. Membership (we'll be planning some socials); Government Affairs (studies what is happening in local, county, state and national government to affect business); Business

Development (works with city and redevelopment agency to bring in new businesses or help develop businesses in the city); Military Affairs (plans activities with the military installations of the area); Youth Committee (members are young people from local highschools who develop programs to work with businesses in the city -

need adult participation). If you're interested in any of these committees, please let us know. We can use your input into the Chamber's activities.

a BOOK
that can
CHANGE your
whole life

Is GOD real to you?
Can you trust HIM?
Is HE near to you?

The Bible tells us we can turn to God for help, for health, for protection. Yet some think these Bible promises are empty. They don't have to be. Today there is a book that is helping many people tune in to the truth of God's nearness. His power and fatherliness. That book is

Science and Health
with Key to the Scriptures.

At a low point of poverty, hopeless illness and loneliness, its author, Mary Baker Eddy, saw that God can be trusted and loved. She found that God heals the sick when we love and understand Him. A deep student of the Bible, she discovered a Science based on living the Christianity Jesus taught. She won her freedom from poverty and disease and from her loneliness. Then she wrote down what she learned for the whole world.

By reading and studying this powerful book along with the Bible, men and women throughout the world have found that God can and will help them. These people have solved housing problems, gained opportunities for better education. They've won freedom from poverty, overcome racism. They've discovered what it really means to be the children of God.

You can borrow a copy of *Science and Health with Key to the Scriptures* from the free lending library at any Christian Science Reading Room, or you can purchase it in paperback.

SPECIAL FREE OFFER
If you'll take this ad to one of these Reading Rooms, you can have your own copy of *Science and Health* to read for thirty days. If at the end of that time you want to keep it, you just pay the nominal purchase price of \$1.95.

Or you can return it to the Reading Room with absolutely no obligation.

More Consumer Service Tips from PG&E

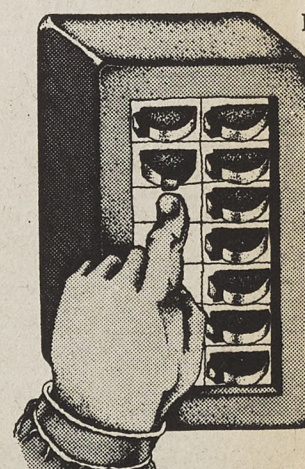

If your lights go out, will you know what to do?

If the lights go out in your house, these tips may help you avoid the inconvenience of waiting for a serviceman to arrive.

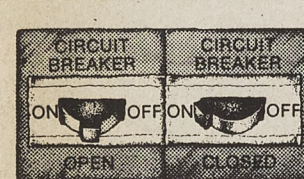

KNOW THE LOCATION OF YOUR FUSE BOXES

Power failures can happen in your home or in the whole neighborhood. If you're not sure which it is, check with your neighbors.

If the power is off in your home only, it's probably a blown fuse or a tripped circuit breaker. Be sure to know where the fuse boxes or circuit breakers are before you really need them, and have spare fuses on hand.

HOW TO DEAL WITH FUSES AND CIRCUIT BREAKERS

When a fuse blows or a circuit breaker trips open, think of it as a warning. Something's wrong with your wiring, or the way you're using your appliances.

First, check your fuse or circuit breaker box which is near the location where PG&E electric service wires connect to your house. If you have circuit breakers instead of or in addition to fuses, one of them may have tripped open.

To reset an open circuit breaker, move the switch all the way to the "off" position. Then reset to the "on" position.

Check the old fuse closely. However, make sure the main power switch (if that main fuse box has one) is turned "off" while you replace the fuse, then turned "on" again. A blown plug-type fuse has a smoked-up window. If it's a cartridge type fuse, test by replacing it with a new fuse.

Be sure to replace a blown fuse with one of the same amperage - no more and no less - and never use a penny or any other metal object to "jump" the fuse (this could cause a fire).

If the problem isn't with the fuses or circuit breakers at this main box, follow the same procedure to check the fuses or breakers inside the house. This secondary box is usually located in a closet or utility room. Again, make sure the switch, if you have one, is turned "off" while you replace the fuse, and then turned "on" again.

HOW TO DETERMINE THE CAUSE

If replacement of a fuse or re-closing of a breaker fails to restore service, you may have too many appliances or lamps on one circuit. Also, one of your lamps, appliances or extension cords could be defective causing a short circuit. Unplug all the electrical appliances or lamps from the circuit, check for damaged or scorched cords or loose plugs, and when you locate the problem, have the faulty appliance repaired before using it again.

If you've followed all the procedures and you're still in the dark, don't hesitate to call PG&E, any hour of the day or night. We'll be happy to help.

NOTICE OF TRUSTEE'S SALE

On Thursday, the 15th day of November, 1973, at ten o'clock a.m., in the lobby of the office of Coast Counties Land Title Company, 439-Tyler Street, in the City of Monterey, County of Monterey, State of California, THE FIRST MONTEREY COMPANY, a California corporation, as Trustee, will sell at public auction to the highest bidder for cash, in lawful money of the United States, the following described real property situated in the County of Monterey, State of California, and bounded and described as follows, to-wit:

Lots Numbered 39, 41 and 43,

As I See It

by Mel Vercoe

Would you believe that we could build two lakes, prevent a lot of crime and get rid of a lot of sewage, all at the same time? It probably won't be done, because the whole thing is too practical to be adopted, but this is how it would work.

First of all, a proposal was made on a recent radio talk program that a recreation lake be built in the Salinas area. Some of the obstacles would be, lack of money and lack of water, but the proposed site near the Sherwood Shopping Center could probably be acquired. Since the idea was attractive, and since I knew where they could get the water free, I suggested a combination solution to the whole thing.

The latest and the most likely to come about solution to the Monterey Peninsula sewage problem, would be to gather it all in one huge pipe and pump it in the general direction of the Salinas Valley. With more room there, than on the Peninsula, it would be better to build treatment plants at the far end of the pipe, and this, of course, would help the Peninsula tourist business more than having the plant near motel row.

With proper treatment the effluent would form a continuous supply of fresh water to build up the water level in the valley and prevent salt water intrusion, as well as providing a reliable supply of irrigation water.

Having a couple of the settling basins near Salinas, would provide boating and fishing facili-

ties that probably would not be bothered much by most species of mosquitoes and would at the same time prevent a lot of accidental drownings, because not many boaters would risk falling overboard.

So, the water would be free and the whole cost of the settling basin lakes and the pipe would be bore by the people getting rid of the sewage and the farmers buying the irrigation water. The only cost to the boating public might be for a bit of shrubbery like roses and violets, planted around the edge, to enhance the possibly off-flavor aroma during tourist season.

There is just one major catch, as I see it, and that is the possibility that with the impending energy shortage, the pumps might be useless and the flow would have to be maintained by men stationed at intervals, armed with canoe paddles.

The ideal answer to that would be, to have law-breakers sentenced to duty on the paddle-line, rather than sent to a stuffy old jail cell to do nothing at all, for whatever their crime merits.

Such a system might drive criminals completely out of the county, thus creating a manpower shortage, but I feel that somebody will figure a way out of that dilemma, when it gets bad enough.
